EDUCATION

Masters in Computer Science
University of Paderborn
2021 - 2026

Bachelors in Computer Engineering
Shah & Anchor Kutchhi Engineering College
2015 - 2019

SKILLS

Programming Languages:

Java, Python, C#

Web Technologies:

HTML, CSS, JavaScript, Bootstrap,
WordPress, Angular

Databases:

MySQL

Tools & Technologies:

Git, GitHub, Visual Studio, Mercury, Unity,
Jira, Confluence, Taiga, Agile-Scrum,
IntelliJ IDEA, Selenium, Maven, Eclipse

Design & Multimedia:

Adobe Photoshop, Adobe Illustrator,
Canva, Movavi

Microsoft Office Suite:

Word, PowerPoint, Excel, Outlook

LANGUAGE

Mother tongue(s):

Odia

Other language(s):

English (C1)

German (B1)

Hindi

Marathi

ABOUT ME

A highly motivated Computer Science graduate with hands-on experience in web development, automation testing, and VR application development. Proven ability to enhance system performance, streamlining workflows, and delivering user-focused solutions. Skilled in Agile collaboration to drive impactful, scalable software projects from concept to deployment.

WORK EXPERIENCE

08/2025 – 10/2025

Intern | Miele

- Developed test automation scripts for the central customer service application, enhancing testing efficiency and reliability.
- Developed JUnit test scripts, including web services to mock JSON data for functionality testing in a customer service application.
- Converted and standardized PDF-based specifications into OpenAPI (Swagger) format for existing REST endpoints, improving API documentation and integration.
- Transferred technical specifications to Confluence, improving documentation accessibility and team collaboration.

09/2019–08/2021

Junior Web Developer | Agile Testing Alliance

- Redesigned and developed responsive websites using HTML, CSS, JavaScript, Bootstrap, Angular, Angular Material, and WordPress.
- Utilized Angular CDK and Angular Material to build scalable, accessible, and user-friendly UI components in Agile environments.
- Improved website performance by optimizing page speed, implementing SEO best practices, and ensuring cross-browser and mobile compatibility.
- Deployed and maintained websites on GoDaddy and Nestify, managing server configurations, security updates, and performance optimization.
- Created visual assets including banners, flyers, and brochures to support branding and marketing initiatives.

MASTER THESIS

05/2024 – 10/2024

Development of a Maturity Level Analysis of Industrial Software Development

- Conducted a systematic literature review to explore ALM and software process maturity models.
- Developed structured assessment by designing questionnaires to evaluate ALM readiness and software development maturity.
- Created a web-based tool that systematically analyzes ALM readiness and maturity, providing data-driven insights for decision-making.

PROJECT

04/2022 – 03/2023

Virtual Reality in System Planning

- Designed immersive VR workstation interface using Unity, C#, and Python.
- Analyzed and visualized ergonomic data with Mercury framework, optimizing workplace design.
- Collaborated using Git for streamlined version control and workflows.
