 Germany

EDUCATION

Masters in Computer Science
University of Paderborn
2021 - 2026

Bachelors in Computer Engineering
Shah & Anchor Kutchhi Engineering College
2015 - 2019

SKILLS

Programming Languages:

Java, Python, C#

Web Technologies:

Angular, Angular Material, Angular CDK,
Angular CLI, HTML5, CSS3, JavaScript,
TypeScript, Bootstrap, WordPress

Databases:

MySQL

Tools & Technologies:

Git, GitHub, VS Code, Unity, Jira,
Confluence, Taiga, Agile-Scrum, IntelliJ
IDEA, Selenium, Maven, Eclipse

Microsoft Office Suite:

Word, PowerPoint, Excel, Outlook

Design & Multimedia:

Adobe Photoshop, Adobe Illustrator,
Canva, Movavi

LANGUAGE

Mother tongue(s):

Odia

Other language(s):

English (C1)
German (B1)
Hindi

ABOUT ME

Frontend Developer with hands-on experience building responsive web applications using Angular, HTML, CSS, and JavaScript. Proven track record of improving page performance, delivering accessible UI components, and taking projects from concept to deployment. Skilled in Agile collaboration to drive impactful, scalable software solutions.

WORK EXPERIENCE

08/2025 – 10/2025

Intern | Miele

- Developed Selenium-based test automation scripts for an Angular customer service portal, significantly increasing test coverage and reliability.
- Wrote JUnit test scripts, including web services to mock JSON data for REST API functionality testing in a customer service application.
- Converted and standardized PDF-based specifications into OpenAPI (Swagger) format for existing REST endpoints, improving API documentation and frontend integration.
- Transferred technical specifications to Confluence, improving documentation accessibility and team collaboration.

09/2019–08/2021

Junior Web Developer | Agile Testing Alliance

- Built and redesigned responsive web applications using Angular, TypeScript, Angular Material, HTML, CSS, and Bootstrap.
- Developed scalable, accessible, and user-friendly UI components using Angular CDK and Angular Material in Agile environments.
- Enhanced website performance through page speed optimization, SEO best practices, and cross-browser and mobile compatibility.
- Deployed and maintained websites on GoDaddy and Nestify, managing server configurations, security updates, and performance optimization.

05/2024 – 10/2024

Master Thesis | Fraunhofer

- Conducted a systematic literature review to explore ALM and software process maturity models.
- Developed structured assessment by designing questionnaires to evaluate ALM readiness and software development maturity.
- Created a web-based tool that systematically analyzes ALM readiness and maturity, providing data-driven insights for decision-making.

04/2022 – 03/2023

Project | Fraunhofer

- Designed immersive VR workstation interface using Unity, C#, and Python.
- Analyzed and visualized ergonomic data with Mercury framework, optimizing workplace design.
- Collaborated using Git for streamlined version control and workflows.

04/2018 – 03/2019

Project | Shah & Anchor Kutchhi Engineering College

- Developed an IoT-based Bridge Health Monitoring System using Arduino and sensors including accelerometer, bend sensor, and vibration sensor.
- Conducted research into IoT applications and sensor systems, implementing anomaly detection and automated alerts.
