PROFESSIONAL SUMMARY

Frontend Developer with experience building responsive web applications using Angular, TypeScript, JavaScript, HTML5, CSS3, Angular Material, and Bootstrap. Skilled in developing accessible UI components, optimizing web performance, and ensuring cross-browser compatibility. Hands-on experience with REST API testing, Selenium, JUnit, OpenAPI/Swagger, Git, and Agile-Scrum methodologies.

TECHNICAL SKILLS

Frontend Development:	Angular, Angular Material, Angular CDK, Angular CLI, TypeScript, JavaScript, HTML5, CSS3, Bootstrap, TailwindCSS, SEO
Programming Languages:	Java, Python, C#
Testing & API:	Selenium, JUnit, REST APIs, OpenAPI/Swagger
Databases:	MySQL
Development & Collaboration:	Git, GitHub, Jira, Trello, Confluence, Taiga, Agile/Scrum
Development Tools:	VS Code, IntelliJ IDEA, Eclipse, Maven, Unity, WordPress

WORK EXPERIENCE

AUG 2025 — OCT 2025

Miele | Intern

- Developed Selenium-based test automation scripts for an Angular customer service portal, improving test coverage and reliability.
- Created JUnit test scripts and JSON-based web-service mocks for REST API functionality testing.
- Converted API specifications into OpenAPI (Swagger) documentation and maintained technical documentation in Confluence.

SEP 2019 — AUG 2021

Agile Testing Alliance | Junior Web Developer

- Built responsive web applications and reusable UI components using Angular, TypeScript, Angular Material, HTML5, CSS3, and Bootstrap.
- Improved website performance, SEO, accessibility, and cross-browser compatibility.
- Deployed and maintained websites, including server configuration and security updates.

MAY 2024 — OCT 2024

Fraunhofer | Master Thesis

- Conducted research on Application Lifecycle Management (ALM) and software process maturity models.
- Developed a web-based tool to assess ALM readiness and software development maturity.

APR 2022 — MAR 2023

Fraunhofer | Project

- Designed a VR workstation interface using Unity, C#, and Python.
- Analyzed ergonomic data using the Mercury framework and Git-based workflows.

APR 2018 — MAR 2019

Shah & Anchor Kutchhi Engineering College | Project

- Developed an IoT-based Bridge Health Monitoring System using Arduino and accelerometer, bend, and vibration sensors.
- Implemented anomaly detection and automated alerts for structural health monitoring.

EDUCATION

Master in Computer Science (M.Sc.) – University of Paderborn | 2021 – 2026

Bachelor of Computer Engineering (B.E.) – Shah & Anchor Kutchhi Engineering College | 2015 – 2019
